

CANADIAN HEMLOCK

Tsuga canadensis

Height: 30-45' **Spread:** 20-30'

Location: Zone 4, sun to shade, well-drained soil.

Shape: Pyramidal

Foliage: Soft, glossy dark green needles

Notes: Long-lived native tree that does well in city conditions. Pyramidal growth, branches often droop. Excellent when used for screening, groupings and accents. Trim into a lovely hedge that thrives under most conditions.
