

WHITE PINE

Pinus strobus

Height: 50-75' **Spread:** 25-40'

Location: Zone 3, sun, moist, well-drained soil

Shape: Dense, pyramidal

Foliage: Soft, blue-green needles

Notes: Fast growing pine, native to a good part of the Eastern United States. Open to loosely pyramidal as a young tree and becoming gnarled and more irregular with age.

WEeping WHITE PINE

Pinus strobus 'Pendula'

Height: 12'+ **Spread:** 6-12'

Location: Zone 4, sun to part shade

Shape: Weeping

Foliage: Soft blue-green needles

Notes: This weeping evergreen has branchlets that touch the ground. It is often trained to a single leader but can be shrubby and multistemmed; the branches spread horizontally for a small distance and then droop; each plant has a unique habit. Cylindrical brown cones dot the soft, gray-green leaves.
